

## Julianstown Traffic Relief

The Julianstown Traffic Relief project is investigating traffic in Julianstown to understand the impact on local residents, businesses, and visitors, and identify potential solutions to reduce these negative impacts. To inform the study we are engaging with people who live, work and visit Julianstown to understand how people move around the area and to understand if there are any constraints the project team should be aware of at this stage. The survey will be live until February 8th and should take about 5 minutes to complete. For details on how the responses are going to be stored and processed please refer to our Privacy Notice

### About You

1

Can you tell us your connection to Julianstown? *You can select more than one answer if applicable.* \*

- ☐ Live in Julianstown
- ☐ Visit Julianstown
- ☐ Work in Julianstown
- ☐ Travel through Julianstown

2

Do you have access to a car/van or motorbike/moped, as a driver? *You can select more than one answer if applicable.* \*

- ☐ Yes - car/van
- ☐ Yes - motorcycle/moped
- ☐ No, none of these

## Study Objectives

6

The following aims have been proposed for this study and we would like to know to what extent you agree or disagree with them. \*

[illegible]

7

Which of these objectives would you consider the **first** priority for Julianstown. *Please select only one answer.* \*

- ☐ 1. Reduce the impact of congestion at Julianstown on strategic regional network traffic
- ☐ 2. Improve the reliability of transport for trips through Julianstown
- ☐ 3. Improve access to education and employment for those who rely on the regional road through Julianstown
- ☐ 4. Reduce the risk of road traffic accidents within Julianstown village
- ☐ 5. Reduce the impact of traffic on noise pollution
- ☐ 6. Manage the impact of transport infrastructure provision on the local environment including architectural conservation, biodiversity, land take and water

8

Which of these objectives would you consider the **second** priority for Julianstown. *Please select only one answer.* \*

- ☐ 1. Reduce the impact of congestion at Julianstown on strategic regional network traffic
- ☐ 2. Improve the reliability of transport for trips through Julianstown
- ☐ 3. Improve access to education and employment for those who rely on the regional road through Julianstown
- ☐ 4. Reduce the risk of road traffic accidents within Julianstown village
- ☐ 5. Reduce the impact of traffic on noise pollution
- ☐ 6. Manage the impact of transport infrastructure provision on the local environment including architectural conservation, biodiversity, land take and water

9

At this stage of the study we are investigating constraints, such as environmental constraints, which would impact on any options taken forward. Please provide any information about the Constraints Study Area (pictured to the right in green) that you think is relevant for the project team to consider when they are developing options:
